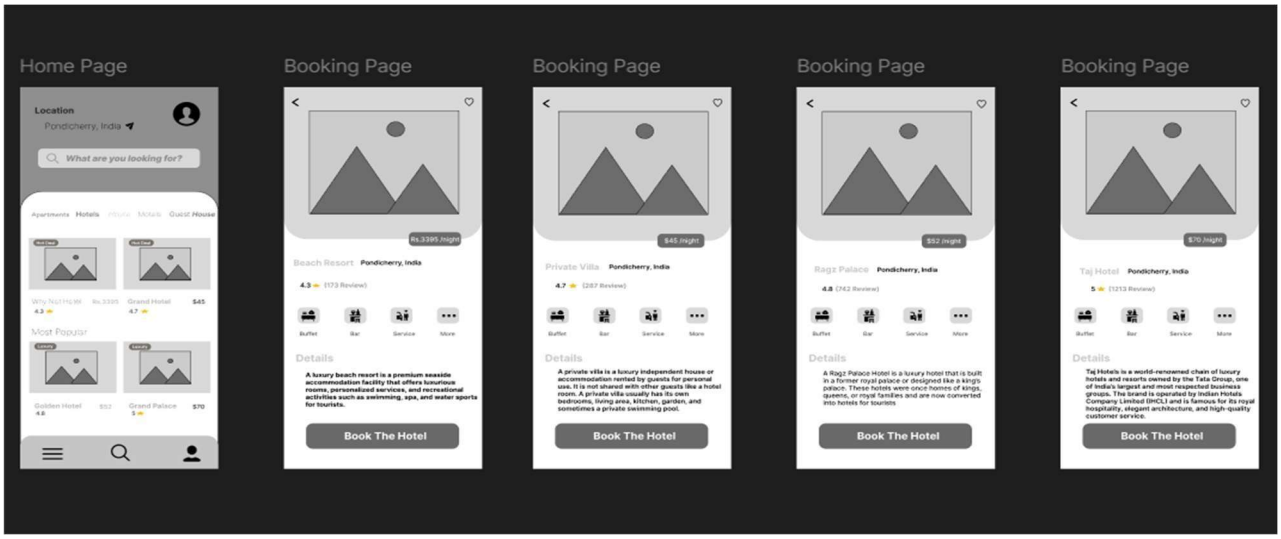
UID Exp: 01

Old UI Design



Features & Drawbacks Identified:

Dull & Monochrome Interface:

- The entire interface is displayed in grayscale.
- Lack of colors makes the UI visually unappealing.
- No emotional connection or brand identity is created.

Poor Visual Appeal:

- Images are placeholders without real visuals.
- No background depth or shadow effects.
- The design looks flat and outdated.

Weak Visual Hierarchy:

- Hotel name, price, and ratings are not clearly differentiated.
- Important elements like price per night are not highlighted properly.
- Text size and weight are inconsistent.

Low Engagement Elements:

- Buttons (Book The Hotel) are plain and blend with the background.

- Call-to-action buttons lack emphasis.
- Icons are small and not visually distinct.

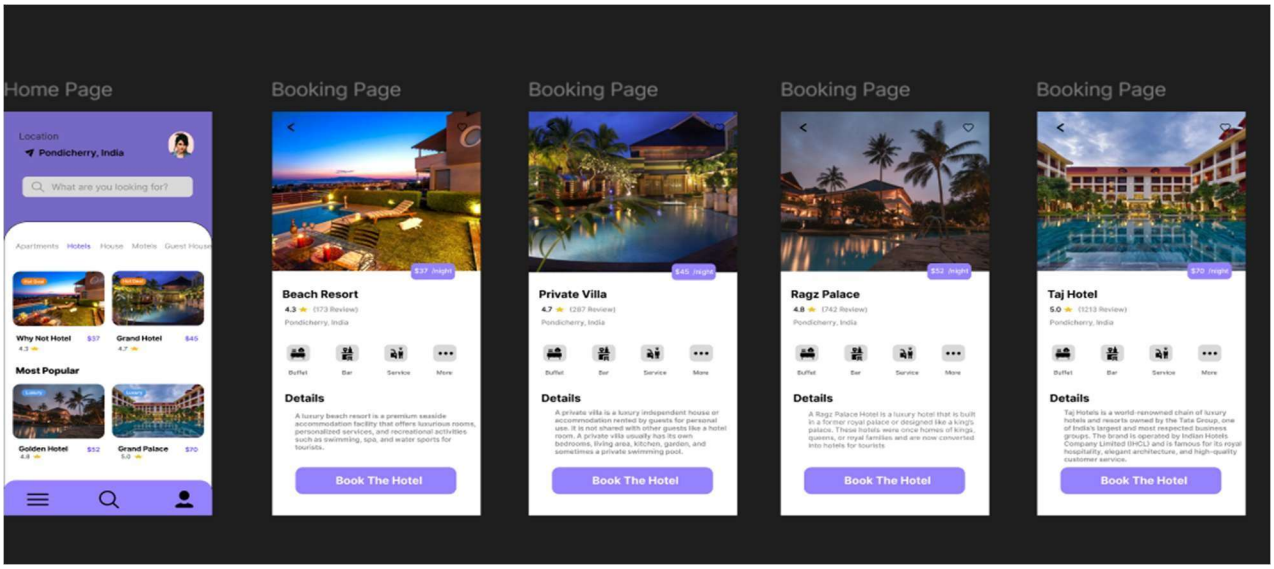
Unstructured Layout:

- Home page categories are not clearly separated.
- Cards look cramped with less spacing.
- Poor alignment reduces readability.

Lack of Brand Identity:

- No consistent theme color.
- No personality in the design.
- Overall UI feels generic and unfinished.

Modified UI Design



Features & Enhancements:

Attractive Color Scheme:

- A modern purple theme is introduced.
- Consistent accent colors are used for branding.
- Background and buttons create strong visual contrast.

Realistic & High-Quality Images:

- Real hotel images are added.
- Images improve user trust and engagement.
- Visual storytelling enhances experience.

Strong Visual Hierarchy:

- Hotel names are bold and clear.
- Price per night is highlighted with colored tags.
- Ratings are visually emphasized using stars.

Improved Typography:

- Proper font sizing and spacing are maintained.
- Clear differentiation between headings and body text.
- Better readability and alignment.

Enhanced Call-to-Action Buttons:

- “Book The Hotel” button is larger and prominent.
- Rounded corners give a modern UI feel.
- High contrast improves visibility.

Better Card Layout:

- Structured grid-based layout.
- Consistent padding and margins.
- Balanced spacing improves visual clarity.

Improved User Experience:

- Navigation feels cleaner and organized.
- Icons are more visible and properly spaced.
- The interface looks professional and production-ready.
